### Profile

I am a first year BSc (Hons) Computer Science for Game student at the University of Brighton aiming to pursue a career in the Games Industry. I am especially interested in programming and the technical side of game development. During my studies, I have developed foundational skills in game making, such as C++ programming, Game Design, Industry Work Ethics, 3D Modelling and Animation. In addition to this, I have gained skills in communication and team working. To hone these skills I am looking for the opportunity to work with professionals to gain necessary industry knowledge as well as put my skills into use.

---
